

Clinically Relevant Computational Haemodynamics

Rainald Lohner,

Distinguished Professor of Fluid Dynamics, School of Computational Sciences, George
Mason University, USA

In this seminar, Rainald will try to cover not only the numerics, but also the clinical relevance of the results in order to aid in the pre- and post-interventional decision-making.

Rainald will be resident in the School of Engineering for the whole week beginning 15th September 2008.
